USC at a light stage with a 3D scanner inside it so one can create images/video of actors with no shadows and then put the lighting they want on the actor (e.g. a sunset).

Funny Cat Videos Motive

Here at Funny Cat Videos, we take funny cat videos seriously, so when it came time for us to determine what videos would do a lazy day justice, we had some pretty stringent parameters. Our picks needed to have insanely good replay value. They needed to have relatable characters and stories easy enough to invest in that even someone hunkered-down with the flu could still enjoy what's going on. And lastly, longer cat movies, Cute Cats, Funny cats, Funniest Cats Compilation and funny animal videos took priority in our research, for obvious reasons (read: time consumption).
